Counting the votes

1. **Round 1:** sort the ballots into piles by the logo marked **1**. Write each pile's count in the Round 1 column.
2. If a logo has **more than half** of the ballots still counting, it wins. Stop and fill in the winner box.
3. If not, the logo with the **fewest** votes is out. Move each of its ballots to that ballot's **next choice** still in the race. If a ballot has no choices left, put it in the "No choices left" row.
4. Count again in the next round. Repeat until one logo has more than half.

Tie for fewest votes? The one with fewer 1st-choice votes in Round 1 is out. Still tied? Flip a coin. **Spoiled ballot** (a number used twice)? Count it only up to the mistake.

Ballots handed in	Spoiled ballots	Counters (2 people)	Date

Logo	Round 1 1st choices	Round 2	Round 3	Round 4	Round 5
Ira	3				
Fedor					
Alexis	5				
Brynn					
Ella	1				
Other: _____					
No choices left					
Ballots still counting					
More than half is					
Out this round					

Make tally marks in each box and write the count in the small box. More than half: 9 ballots still counting means 5 or more; 8 means 5 or more; 7 means 4 or more.

Our winning logo

The winner is Alexis **'s logo**

It won in Round 1 **with** 5 **votes out of** 9 **still counting.**
